

Flowdish Pricing Recommendation

Partner briefing: recommended commercial model for selling Flowdish as a chef-led consultancy and software package for independent restaurants.

Positioning

Flowdish should be sold as a consultancy-led implementation, not as ordinary software. The offer is: make the restaurant safer, more compliant, better costed, easier to run, and more profitable, with Flowdish as the system that keeps the work alive after the visit.

Recommended Main Offer

Package	Year 1 Price	After Year 1	Includes
Flowdish Pro Launch	EUR549/month for 12 months	EUR249/month	Onsite HACCP/menu profitability setup, Flowdish Pro, one tempera

Suggested Product Tiers

Tier	Price	Best For	Notes
Flowdish Lite	EUR79/month	Small cafes/takeaways	HACCP logs, prep, waste, basic supplier/product records, basic cold s
Flowdish Kitchen	EUR149/month	Normal restaurants	HACCP, BOMs, supplier products, deliveries, inventory, prep planning,
Flowdish Pro	EUR249/month	Serious independent restaurants	Full system: HACCP, menu costing, BOM, AI dockets/Z-reads, plannin

Consultancy Fee Structure

Recommended launch consultancy: EUR3,000 to EUR4,500 depending on scope. For a typical independent restaurant, start with EUR3,600 setup/consultancy plus EUR249/month Flowdish Pro.

If the client cannot pay upfront: EUR300/month for 12 months consultancy repayment plus EUR249/month software. That creates a simple year-one price of EUR549/month, dropping to EUR249/month after the first year.

Optional upfront discount: EUR3,000 setup paid upfront plus EUR199/month for 12 months, then EUR249/month after year one.

Hardware and AI Usage

Include one cold-storage probe in Flowdish Pro Launch. Additional probes can be charged at EUR149 setup each or EUR10-EUR15/month each. AI imports should be fair-use at first; token usage can be monitored and later charged separately for unusually heavy users.

Contract Approach

Recommended wording: Consultancy fee EUR3,600, payable in 12 monthly instalments. Software subscription EUR249/month, first month free if needed. Minimum term 12 months. After month 12, rolling monthly, cancellable with 30 days notice.

Do not market this as 'cancel anytime' if the first year is a fixed-term repayment. Have a solicitor draft the final terms, especially around early cancellation, unpaid instalments, data access, and what happens if the client stops paying.

Recommended First Sales Pitch

EUR549/month for 12 months. Includes onsite HACCP and menu profitability setup, Flowdish Pro, one temperature probe, AI delivery and sales imports, staff training, and support. After 12 months, the price drops to EUR249/month for Flowdish Pro.

Market anchor: FoodDocs publicly lists food safety software plans from \$99-\$299 per site/month, with onboarding fees shown around \$999-\$1,249 for some plans. MarketMan publicly lists restaurant inventory software from \$199/month and Growth at \$249/month. Flowdish should therefore be priced as a combined software plus chef-led implementation service, not just as a low-cost app.
